REMARKS

In the Examiner's reasons for allowance, the Examiner states:

> Prior art, alone or in combination fail to teach or disclose a magnetic memory stack having a combination of three angled lines (decoders) for producing magnetic fields to switch states of memory cells in a magnetic memory device.

Applicants agree that the art of record does not teach or suggest the recited limitations. The Examiner, however, did not accurately cite limitations from all of the claims, and only cited portions of some of the claims. Further, the recited limitations do not exactly appear in all of the independent claims. Applicant submits that no words or terms should be "read into" a claim based on the statements of the Examiner. Instead, the present claims are allowable for at least the reason that the art of record does not teach or suggest all of the limitations of the claims as actually recited in the claims themselves. Applicants therefore respectfully assert that the scope of each claim as allowed is to be determined from the actual claim language, including all equivalents.

Respectfully submitted,

Date: October 25, 2005
